Remark	

"NP" sign posted on IEC for failure to appoint audit committee members as required by the SET

As the International Engineering Public Company Limited (IEC) informed the resignation of 2 audit committee members effective on August 1, 2017 (Details as shown on IEC's news on July 31, 2017)

Presently, IEC has been unable to appoint the audit committee members within 3 months as required by the Stock Exchange of Thailand (SET)'s regulation. Therefore, according to the procedures for the listed company that fails to meet the audit committee member requirement, the SET has posted "NP" (Notice Pending) sign on IEC's securities effective from November 1, 2017 until IEC appoints the audit committee members as required by the rules.

Furthermore, in the case that IEC is unable to appoint the audit committee members within the SET deadline; the SET will proceed as follows.

1. Post "SP" (Suspension) sign to suspend trading of IEC's securities on February 1, 2018, if after three months of carrying the "NP" sign, IEC still has not met the audit committee member requirement.
2. Announce that IEC may be delisted, if after three months of carrying the "SP" sign, the audit committee member requirement is still not met. Then, the SET may delist IEC's securities if the company still cannot meet the SET's audit committee member requirement.
