

Listed companies having the insufficient number of audit committee members.

An audit committee is widely known as a mechanism that facilitates good Corporate Governance and ensures the quality, credibility, and objectivity of this governance. Consequently, the Stock Exchange of Thailand (SET) determines that all listed companies must have, at all times, at least three members in their audit committee.

As of June 30, 2018, there are nine listed companies having insufficient members in their audit committee. To ensure that shareholders, investors, and other related parties are properly notified, in particular, listing status, the Exchange has decided to announce the names of those companies.
