

Ref.No.IVL001/02/2021

17th February 2021

President

The Stock Exchange of Thailand

Subject: Cold weather conditions in the USA

Indorama Ventures Public Company Limited (“**IVL**” or the “**Company**”) would like to inform that Gulf Coast USA and parts of Mexico are facing freezing cold weather conditions leading to significant supply chain issues including natural gas supplies which are expected to normalize in next few days. As part of Industry practice and our safety protocol, IVL plants in Texas in our Integrated Oxides and Derivatives (IOD) have taken precautionary measures to temporarily halt production and we expect to resume full production within February.

The Company is not anticipating any material impact on other North American locations or on our Combined PET and our Fibers segment although the existing supply tightness will be exaggerated. The Company is working closely with suppliers and customers to ease the pressure.

Please be informed accordingly,

Yours faithfully,

(Mr. Souvik Roy Chowdhury)

Company Secretary
