SET Index, also known as the Stock Exchange of Thailand (SET), is a capitalization-weighted index of the most liquid securities traded on the SET. It serves as a benchmark for investment in Thailand, and its performance is widely followed by investors, economists, and policy makers. The SET Index is calculated using the market capitalization of each component stock weighted by its market capitalization.

The SET Index is divided into several sub-indices, including the SET100 Index, SET50 Index, and SET100 Index. These indices provide a broader perspective on the performance of the Thai stock market and are used to gauge the overall health of the economy.

The SET Industry/Sectoral Index 8 Group Indexes 27 Sectoral Groups Indexes is a comprehensive index that covers all major sectors of the Thai economy, providing a detailed overview of the performance of each industry. This index is calculated using the market capitalization of each component stock weighted by its market capitalization.

The SET High Dividend 30 Index is another important index that focuses on high dividend-paying stocks. This index is calculated using the dividend yield of each component stock, providing a valuable tool for investors looking for companies with strong dividend-paying histories.

The SET Composite Index 30 is a broad market index that encompasses all stocks listed on the SET, making it a useful benchmark for the overall performance of the Thai stock market.
