- SET Index is a composite index. It is a market capitalization-weighted index which represents the price movement for securities trading on the Stock Exchange of Thailand.
- The SET50/100 Index reflects the large-market capitalization index of the Stock Exchange of Thailand, providing a benchmark of investments in the SET. Both indices are calculated based on the stock prices of the top 50 and 100 listed companies on the SET respectively, taking into consideration free float, liquidity and their market capitalization.
- The sSET Index represents the price movement of common stocks apart from constituents in the SET50 Index and SET100 Index, that have constant liquidity and comply with requirements regarding the distribution of shares to minor shareholders.
- The SET High Dividend 30 Index (SETHD) reflects price movements of stocks that have large market capitalization, are consistently traded with high liquidity, and especially have constantly paid high dividend yields.

"SET Index", "SET50 Index", "SET100 Index", "sSET", "SETHD", and all indices (collectively called "SET Index series") are the registered trademarks and/or service mark solely owned by, and proprietary to the Stock Exchange of Thailand. SET Index Series can be used to create a range of index-linked products e.g., tracker funds, structured products, ETF, etc. Such product creation is subject to approval by SET and licensing fee.
